WALTHER STRONG®

The HD Blue Scrim is a high-performance self adhesive reinforcing mesh designed for both internal and external applications. Suitable for use with plaster multi-finish, self leveling compounds, and cement based systems, it provides reliable reinforcement across a wide range of construction and finishing tasks.

Engineered for heavy duty performance, it bonds securely to cement boards, Dukka wetroom boards, concrete boards, magnesium oxide panels, Smartply, and AQUA panels.

With a tensile strength of 120N/50mm and enhanced with advanced ALKAMAXX coating technology, HD Blue Scrim is fully waterproof and alkali resistant ensuring long term durability in high alkali environments.

- Eliminates cracks
- High strength adhesive
- For heavy duty applications
- Completely alkaline and water resistant
- Bonds to rougher surfaces
