WALTHER STRONG®

HD Post Tape is the ultimate solution for extending the life of timber posts. Designed with advanced M50+ morphing rubber adhesive, the tape effectively fills the indentations left by incising, preventing water from being trapped on the surface. This unique adhesive ensures that moisture, UV rays, and harmful microbes are kept away from the timber, which is especially important at ground level, where posts are most vulnerable to decay.

To maximise its effectiveness, apply the tape 50-75mm above ground level to protect your posts from rot, UV degradation, and microbial damage.

STEP 1

Measure & cut tape to desired lengths

STEP 2

Position on post and apply pressure to fully secure (50mm above and below ground level)

STEP 3

Install posts at desired depths

EACH SINGLE ROLL PRODUCES ENOUGH FOR:

SIZE OF POSTS	NUMBER OF POSTS
3X3 POST (75mm x 75mm)	30
4X4 POST (100mm x 100mm)	26
4X3 POST (100mm x 75mm)	26
5X5 POST (125mm x 125mm)	20
6X6 POST (150mm x 150mm)	16
8X8 POST (200mm x 200mm)	12

Note: Store in a cool, shaded area away from direct sunlight. If the tape is difficult to remove from the backing, pull firmly at a 45 degree angle, the adhesive should release cleanly from the plastic.

NEVER COMPROMISE ON THE FIRST LINE OF DEFENCE
