WALTHER STRONG®

Mati Mount Tape is a heavy duty, double-sided adhesive tape designed to bond almost anything – from wood, metal, paper, and glass to challenging surfaces like foam and uneven walls. Its versatile strength makes it ideal for industrial applications, LCD panels, glass framing, lens and parts assembly, electronics, home appliances, decorative strips, and more.

Engineered for extreme performance, Mati Mount Tape is a 700 micron, self wound adhesive with a reinforced internal scrim for added strength. This scrim provides cohesive grip even on weaker substrates, delivering a secure, lasting hold that rivals nails, screws, or rivets.

The high tack synthetic rubber adhesive bonds to almost any surface, even porous or uneven ones, while its specialist siliconised release liner ensures smooth, easy application.

- Internal & external use
- Replaces rivets, screws & bolts
- Used for motorway signage
- 90 newton tensile strength
- Bonds GLP & works with PVC or stainless steel
- Woven & reinforced double-sided tape
