WALTHER STRONG®

Self-expanding foam tape is a soft and flexible expanding foam used predominately as a weather seal to prevent water ingress and retain heat in external and internal applications.

When applied under high compression, this tape delivers a reliable, weatherproof seal. In lower compression settings, it provides a draught-proof, clean, and aesthetically refined join, seamlessly bridging smooth and irregular surfaces such as brick, concrete, wood, and plastics.

HOW TO APPLY

STEP 1 - PEEL THE BACKING

STEP 2 - APPLY TO SURFACE

STEP 3 - WAIT 2-3 HOURS

STEP 4 - TAPE HAS FILLED GAPS

- Perfect for creating airtight seals
- Expands between 5 – 35mm
- Permanently Elastic
- Self-expands gradually over 2-3 hours
- Effective on smooth & uneven surfaces
- Open-cell polyurethane foam tape
