REINFORCED

ALKALI RESISTANT

DURABLE

YOUR NEAREST MERCHANT:

OUT WITH THE OLD, IN WITH THE NEW

HOW TO APPLY

HD RebarFlex is designed to **reduce movement** in patios, driveways and slabs by reinforcing the concrete beneath the finished surface. By helping to **distribute loads evenly** across the area, it **reduces stress points** that can lead to cracking, crumbling and surface failure over time.

The result is a more stable base that supports **longer lasting landscaping** projects, helping to reduce the risk of costly repairs and call backs caused by everyday use, ground movement and weathering.

SUITABLE APPLICATIONS

- ✓ Patios & paving
- ✓ Resin bound driveways
- ✓ Screed applications
- ✓ Garden paths & walkways
- ✓ Shed bases & foundations
- ✓ Concrete slabs
- ✓ Hot tub bases / outdoor structures
