

Scrim tape that stays put

Applications:

- Plastering tape
- Corner plasterboard joints
- Ceiling plasterboard joints
- Repair cracks in plasterboard walls

Easy Release 8/10

Stickiness 10/10

Easy Tear 0/10

Walther Strong Scrim Tape is uniquely designed to meet the needs of professional contractors.

Using two different types of adhesive – a backing adhesive that forms a layer on the scrim fibres and a new, fully pressure-sensitive adhesive that is applied to the first backing adhesive – Walther Strong Scrim Tape has been tried and tested in both cold and hot environments without drying out into the glass fibre so it stays put and doesn't crack.

Tip: The easiest way we found to tear our Scrim Tape is using a plasterer's trowel which cuts through it easily under a bit of pressure.
